**Important Section** – In this case Broadcasting Tool will send SMS Automatically.

- Create a file in Ms-Excel only one sheet will be in your file delete all other sheets.
- In First column type mobile numbers
- In Second column type message

Example given below

<b>1<sup>st</sup> Column</b>	<b>2<sup>nd</sup> Column</b>
9412307366	Conference will start on 9.00 A.M.
9760013830	Conference will start on 9.00 A.M.
9897591202	Salary has deposited in your Account.

**Note** – No headings will be in Column. Otherwise it will create problem.

**Instant** – Message will broadcast at once one by one as in sequence.

**Schedule** - Message will broadcast on Schedule Date, Hour & Time one by one as in sequence.

**Technical Note** –

- Some times due to heavy traffic on server message delivery time will late.

*Thanks – Air2sms Team*
